

Serial No. 10/685,808

Docket No. HI-0181

Amendment dated January 2, 2009**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) In a description of multimedia contents based on a usage environment descriptor and a user preference descriptor of the multimedia contents, a method of generating a digital item declaration document configured to be implemented in an electronic device, the method comprising:

applying a "ChoicePrecedence" to ~~the an~~ input DID instance document;

modifying a corresponding "ChoicePrecedence" of the input DID instance document in an order designated in the "ChoicePrecedence"; and

generating a rearranged DID instance document, wherein the "ChoicePrecedence" is a ~~relative an absolute~~ precedence and ~~designates higher or lower than a "BaseChoice"~~.

2. (Previously Presented) The method of claim 1, wherein a process of inserting a DIAinDID descriptor into the DID instance document is preceded so as to make it possible to modify the input DID instance document adaptably, wherein the DIAinDID represents a corresponding choice.

Serial No. 10/685,808

Docket No. HI-0181

Amendment dated January 2, 2009

3. (Previously Presented) The method of claim 2, wherein the DID descriptor includes a "TargetChoice" and a target choice condition.
4. (Previously Presented) The method of claim 1, wherein the input DID instance document is an original DID instance document.
5. (Previously Presented) The method of claim 1, wherein the input DID instance document is a recently adapted DID instance document obtained by modification just before adaptation.
6. (Previously Presented) The method of claim 1, wherein the input DID instance document is a newly adapted DID instance document generated by a current adaptive modification.
7. (Previously Presented) The method of claim 1, wherein the "ChoicePrecedence" applies a "SpecifiedPrecedence".
8. (Previously Presented) The method of claim 1, wherein the "ChoicePrecedence" applies a "BaseChoice".

Serial No. 10/685,808

Docket No. HI-0181

Amendment dated January 2, 2009

9. (Canceled)

10. (Previously Presented) The method of claim 1, wherein the "ChoicePrecedence" is designated as one of a "First" precedence, a "Second" precedence, a "Third" precedence and a "Last" precedence.

11. (Previously Presented) The method of claim 1, wherein the "ChoicePrecedence" includes a "Preemptive" excluding previously considered choices from consideration and performing a configuration process while considering only a designated choice.

12. (Previously Presented) The method of claim 1, wherein the "ChoicePrecedence" includes a "Delete" precedence deleting a designated choice and performing a configuration process.

13. (Canceled)

14. (Previously Presented) The method of claim 1, wherein the rearranged DID instance document is generated by using an attribute of "reset" for using an original DID instance document as an adapted DID instance document just before in case the "ChoicePrecedence" is applied to generate the DID instance document.

Serial No. 10/685,808

Docket No. HI-0181

Amendment dated January 2, 2009

15. (Previously Presented) The method of claim 1, wherein the rearranged DID instance document is generated by using an attribute of "reorder" for referring to choice, which does not exist in an adapted DID instance document just before, in an original DID instance document in case the "ChoicePrecedence" is applied to generate the DID instance document.

16. (Previously Presented) The method of claim 1, wherein the rearranged DID instance document is generated by using an attribute of "before" to represent whether to designate higher or lower precedence than a "BaseChoice" in case the "ChoicePrecedence" is applied to generate the DID instance document.

17. (Currently Amended) In a description of multimedia contents based on a usage environment descriptor and a user preference descriptor of the multimedia contents, a method of generating a "ChoicePrecedence" descriptor of a digital item configured to be implemented in an electronic device, the method comprising:

describing a "TargetChoice" of the digital item, a condition if necessary, and a "ChoicePrecedenceClass"; and

describing a "SpecifiedPrecedence" or a "BaseChoice" to the "ChoicePrecedenceClass", wherein the "ChoicePrecedence" is ~~a relative~~ an absolute precedence and designates higher or lower than a "BaseChoice".

Serial No. 10/685,808

Docket No. HI-0181

Amendment dated January 2, 2009

18. (Original) The method of claim 17, wherein the "ChoicePrecedenceClass" includes a "First" precedence meaning an absolute precedence of a corresponding choice, a "Second" precedence, a "Third" precedence, a "Last" precedence, a "Preemptive" precedence, and a "Delete" precedence.

19. (Original) The method of claim 17, wherein the "ChoicePrecedence" descriptor includes an attribute of "reset" for using an original DID instance document as a recently adapted DID instance document, an attribute of "reorder" for referring to choice, which does not exist in an adapted DID instance document just before, in an original DID instance document, and an attribute of "before" for representing whether to designate higher or lower precedence than a "BaseChoice".
